ITIL Certified Professional
AWS Certified Solutions Architect
OCI Generative AI Professional
OCI Data Science Professional
OCI AI Foundation Associate
Oracle Cloud Infrastructure Associate

Professional Summary

IT Operations and Production Support Engineer with 14+ years of experience supporting critical banking and enterprise applications. Expertise in Linux Administration, Autosys, Control-M, Incident Management, AWS, Oracle Cloud Infrastructure (OCI), Kubernetes, and automation scripting. Maintained highly available environments, reducing operational risks, ensuring SLA compliance, and driving process automation. AWS and OCI certified professional with strong experience in production support, monitoring, release management, and business continuity.

Technical Skills:

Operating Systems	Linux, Unix, AS400
Cloud Platforms	AWS, Oracle Cloud Infrastructure (OCI)
Automation & Scripting	Bash Shell Scripting, GitHub Actions
Scheduling Tools	Autosys, Control-M, Crontab
Containerization	Kubernetes
ITSM & Operations	Incident Management, Release Management, Change Management, SLA Management
Version Control	Git, GitHub
Monitoring Tools	Geneos Monitoring & Alert Management
Documentation	SOP Creation, RCA, Operational Runbooks

Project Experiences:

Project Name	Specialised Compute Service Operations
Organization	CBA India Private Ltd, Bangalore
Role	Associate Systems Engineer
Duration	April 2022 to Till Date

Responsibilities:

- Provided L2/L3 operational support for critical banking applications, ensuring adherence to SLA and operational excellence standards.
- Managed incident triage, troubleshooting, and resolution across Linux, Autosys, AS400, and middleware platforms.
- Implemented and deployed Autosys JIL changes through GitHub Actions, improving release efficiency and reducing manual intervention.
- Performed production and non-production Java patching activities to maintain security compliance and platform stability.
- Executed critical batch processing and Close-of-Business activities with 100% operational accuracy.
- Managed restore activities for production AS400 environments, ensuring data integrity and business continuity.
- Identified automation opportunities through Bash scripting and workflow optimization initiatives.
- Contributed to achieving zero Priority-1 incidents through proactive monitoring and operational controls.
- Analyzed recurring incidents through monthly operational reviews and implement preventive measures to reduce downtime.
- I'm passionate about continuous learning and upskilling ,holding Active Associate-level and Professional-level certifications in cutting-edge technologies like AWS, DevSecOps, Artificial Intelligence and Machine Learning. I'm excited to leverage my skills and experience to drive business excellence and contribute to the organization's success.
